AUTUMN FUN!

Autumn is a beautiful season.

The weather becomes cooler, and the leaves on many trees change color.

They turn red, orange, yellow, and brown before falling to the ground.

Many families enjoy spending time outside during autumn.

They go on nature walks, collect colorful leaves, and visit pumpkin patches.

Some people carve pumpkins into funny faces for Halloween, while others bake pumpkin pies for Thanksgiving.

Animals also get ready for winter.

Squirrels gather nuts, and some birds fly to warmer places.

Farmers harvest apples, corn, and other crops from their fields.

Autumn is a wonderful time to enjoy nature, wear cozy sweaters, and have fun with family and friends.

QUESTIONS

1.) What happens to the leaves in autumn?

2.) Name two colors that leaves can become.

3.) Where do many families visit in autumn?

4.) What do squirrels collect?

5.) Why do some birds fly to warmer places?
