HALLOWEEN MULTIPLICATION WORD PROBLEMS

Directions: Read each Halloween story problem. Write the multiplication equation and solve.

1. A pumpkin patch has 24 rows of pumpkins. Each row has 18 pumpkins. How many pumpkins are there altogether?

2. A Halloween party has 36 tables. Each table holds 12 cupcakes. How many cupcakes are prepared in total?

3. A haunted house gives each visitor 15 pieces of candy. If 48 visitors enter, how many pieces of candy are given away?

4. A witch brews 27 bottles of potion every day for 14 days. How many bottles does she make altogether?

5. A costume shop displays 32 racks of costumes. Each rack holds 16 costumes. How many costumes are on display?
